

# City & Guilds 2381 – 16th Edition Wiring Regulations

## City & Guilds 2381

Traditionally recognised as necessary for all installation electricians, this course is increasingly regarded as essential for those who are involved in, or supervise, electrical work such as electrical maintenance, control or instrumentation. Current legal requirements for employee competence in electrical work now require that anyone involved in certain electrical activities – for example, simply choosing the size or type of cable or fuse – must be aware of the regulative requirements associated with such work.

Our City & Guilds 16th edition qualification is a theory based course, covering such topics as the protection for safety; selection and erection of equipment; and inspection and testing to meet the standards of the IEE Wiring Regulations.

The course is taught over 3 days, with a multiple choice computer-based exam on the third day. The exam is classed as 'open book', so candidates can reference the following materials: • BS 7671 (16th Edition Wiring Regulations) • IEE On Site Guide

## Benefits

This course is designed to provide participants with the knowledge necessary to successfully sit the City & Guilds 2381 examination, as well as gaining useful information about the technical issues in the Regulations that will help in their work activities.

On completion of the course, participants will understand:

- the regulative requirements
- the scope and object of the Regulations
- the fundamental requirements for safety
- the definitions and terms used in the Regulations
- how protection for safety is achieved
- the correct methods of selection and erection of equipment
- the requirements for special locations
- how inspection and testing should be carried out
- how to use the Regulations in the design, construction and maintenance of installations

## Does It Apply to Me?

This is an industry recognised qualification aimed at those currently working in the electrical industry, intended to ensure participants comply with the applications and requirements of the 16th Edition Wiring Regulations.
